

Where are my Wingdings?

Recently at a development meeting I blusted "Dude, this is so easy I'll just write a calculated field and use a Wingding font so a postive response reselts in an thumb going up, negative, its going down and 0 with whatever Bing-Bada-Boom" To my dismay I discovered Wingdings aren't supported!

Even on this page Wingdings are supported What Up with that! Imagine possibilities using these just to start with
