

Filled maps at postcode level for Australia & New Zealand

It would be great to be able to create filled maps at the postcode level for Australia & New Zealand. This is currently available for US zipcodes only. We currently are able to achieve this via a multi-step process using polygons but this is slow and more complicated. We do a lot of work in the Higher Education sector and filled maps at the AU/NZ postcode level would be extremely beneficial for ALL Australian universities.

Thanks,
Chris.
