**Describe Data Source**

**What**
Describe data source with statistical summaries and identification of possible dimension hierarchies & primary keys in addition to what is already suggested in Ability To View "Describe Field" For All Dimensions & Measures At One Time (Summary Page).

**Why**
It makes it easier and faster for dashboards authors to understand connected data sources.

**How**
In a similar way as already featured Describe for Sheet, Dimension, and Measure:
Describe Data Source

with data analysed for possible hierarchies and primary keys as done below:

See more in attached spreadsheets.
