

Tableau Prep: Flow Summary Overview

What is your idea?

Have an easy to read summary of all the actions/changes as the data moves through the flow that can be exported into a PDF with supporting diagrams.

Can be as simple as take existing step notes and compiling into a single document.

What problem are you trying to solve or what scenario would this idea solve?

- Improved troubleshooting / Process Improvement
- Increase visibility of actions required to get 'clean data'
- Ability to provide documentation to the business in a way a non-technical user can understand.

--> Note from Ciara Brennan
