

Update Extensions Page saying they don't work on Tableau Public

I can't imagine how many of us have worked how many lost hours learning about extensions, downloading them, reading the individual bits on all of them, installing them, testing them, publishing to Tableau Public... only to learn they don't work on Tableau Public.

How about a one-sentence statement telling us this before we waste so much of our time?

I love Tableau... and I love not wasting time even more.

Thanks!
